

# BRAINS NMAT REVIEW (since 1986) — the *first*, the *best* NMAT Review in the country!

*Choose the program that suits you best.*

## PREMIER EDITION

The gold standard of NMAT review programs. Complete, intensive, and appropriately paced for premed majors and *those who have taken courses in Chemistry and Physics*. Your best choice if you're the type who doesn't take chances when your dreams are concerned.

## SPECIAL EDITION

For non-premed majors who have not taken the required premed science courses (Biology, Chemistry and Physics), this program is appropriately paced to give reviewees enough time to absorb foundation concepts and processes before proceeding to the preview of higher subjects. Ideal for Nursing majors and those in the AB or BA (Bachelor of Arts) courses.

## SHORT COURSE

For highly motivated, high performing, and confident premed students with strong backgrounds in the science and math courses. Fast-paced lectures that cover all subject areas make it ideal for students who might be too busy for a long and detailed review.

## INTERNATIONAL AND GRADUATE EDITION

For local graduates and international reviewees, this program features daily evening classes. It's the Special Edition that's compacted into a six-week program, adjusted to accommodate students from a wide variety of academic backgrounds.

## MIDYEAR PREMIER PLUS

For students busy during the semester, Midyear Premier is the answer. It features a full Premier program in June and July WITH an *optional*<sup>1</sup> refresher of the NMAT Part 2 subjects in September.

<sup>1</sup> Please see our website for details.

	PREMIER EDITION	SHORT COURSE	SPECIAL EDITION	INTERNATIONAL/ GRADUATE EDITION
